INEQUALITIES

OPPORTUNITIES:

UNCHAINING LAND RIGHTS

Blockchain technology is unlocking land rights for the most vulnerable. Secured rights are the first step to improving livelihoods and their access to financial products and safeguarding investments.

ILLUMINATING SUPPLY CHAIN

Digitization of the supply chain using blockchain and smart contracts improves transparency, enabling more informed purchases for consumers and suppliers. Increased visibility increases the wellbeing of all stakeholders in the supply chain.

**Embracing

GLOBAL OPPORTUNITY
REPORT 2017

I driver per l'Assurance' della Supply Chain

When it comes to pressure to demonstrate a sustainable supply chain, the main drivers are *CUSTOMERS* i.e. Buyers

DNV GL Viewpoint research: «Is your supply chain fit for the future January 2018»

I dilemmi più ricorrenti

Ma i Buyer ed i fornitori hanno le stesse aspettative?

I nostri acquisti sono sempre efficienti in termini di costi?

Buyers
(e.g. brand,
retailer etc.)

Suppliers

La ISO 20400 ...

Lanciata nel maggio 2017 dalla ISO Technical Committee ISO/PC 277, la linea guida ISO 20400 supporta le organizzazioni:

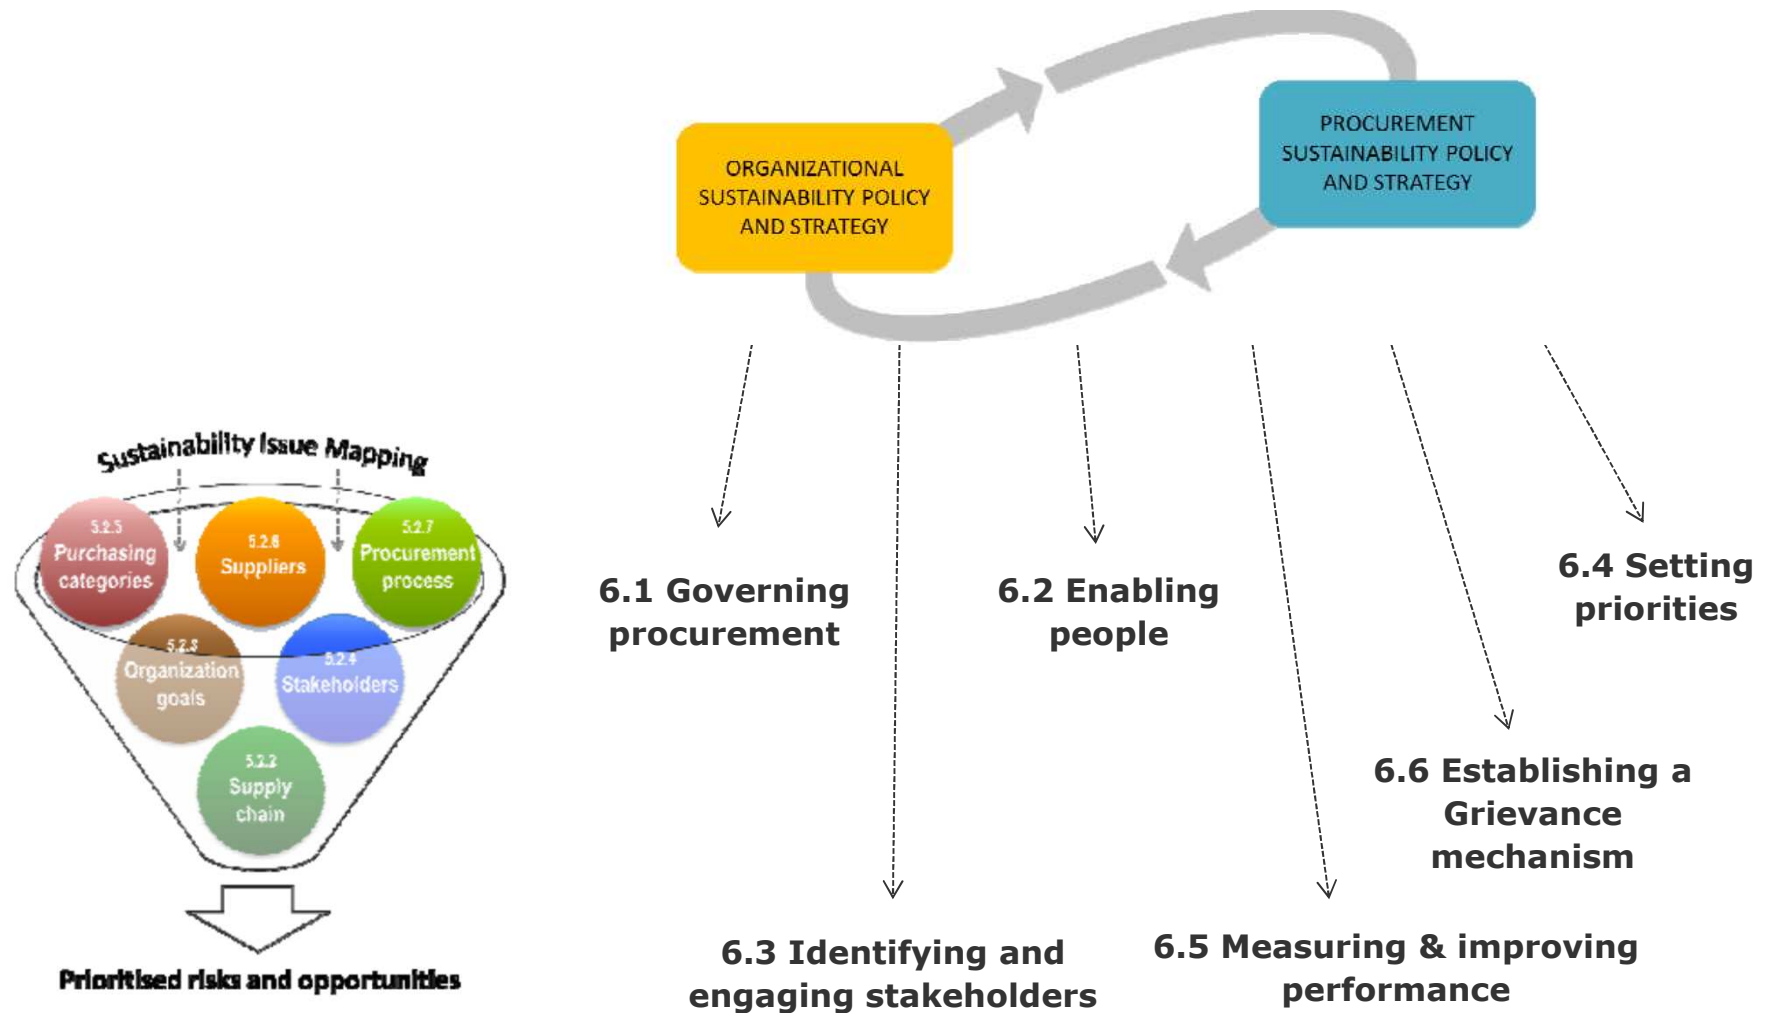

- nella transizione da un approccio che punta alla promozione e monitoraggio della compliance dei propri fornitori (**Responsible Sourcing**) al raggiungimento di obiettivi di sostenibilità attraverso pratiche di acquisto e decisioni (**Sustainable Procurement**)
- nella **massimazione di 'valore condiviso'** lungo la value chain

Non è uno standard certificabile!

(esattamente come la ISO 26000)

... e il suo framework di riferimento

Le opportunità della ISO 20400

*ASK NOT WHAT YOUR SUPPLIERS CAN
DO TO SHOW THAT THEY ARE
RESPONSIBLE, BUT WHAT YOU CAN DO
TO MAKE YOUR OWN SUPPLY CHAIN
MORE SUSTAINABLE...*

From Responsible Sourcing to Sustainable Procurement

Beginners	Leaders
reactive and narrow-focused	pro-active and holistic
informal, self-conducted, internalized	structured, engaging with independent specialised audit firms but also directly with suppliers
limited to tier-1 suppliers	penetrating all tiers
added-on process	integrated process, business as usual
manage risks	seize opportunities
perceived cost	perceived benefit

RESPONSIBLE
SOURCING

SUSTAINABLE
PROCUREMENT
